Percentage - 93.5%

Experience

Slash Mark | [Link](#)

Cyber Security Internship · Cyber Security Intern · Internship

Sep 2026 - Present

Online

Selected for a Cyber Security Internship at Slash Mark IT Solutions. The internship will provide practical exposure to real-world tasks and projects related to cybersecurity, with a focus on developing technical knowledge, problem-solving abilities, and professional skills. During the internship, I will work on assigned projects and tasks, follow company guidelines, and apply cybersecurity concepts in practical scenarios.

3Skill | [Link](#)

Web Development · Web Developer · Internship

Jun 2026 - Aug 2026

Online

Worked as a Web Development Intern, where I designed and developed 6 web-based projects, including a LinkedIn Clone, Personal Portfolio, Stellar Void, Event Management System, and Real Estate Management System. I was responsible for developing responsive and user-friendly interfaces, implementing frontend functionality, integrating interactive features, debugging and testing applications, and improving overall website performance and usability. Through these projects, I gained practical experience in modern web development, UI/UX design, problem-solving, and project development using technologies such as HTML, CSS, JavaScript, and related web development tools.

Projects

Noise Pollution Monitoring System | [Github](#)

Academic Project · Node.js, Express.js, MySQL, PostgreSQL, JavaScript, REST API, JWT, GitHub

Jan 2026 - Apr 2026
Web Development / IoT / Environmental Monitoring

Developed a real-time crowd-sourced Noise Pollution Monitoring System to collect, manage, and monitor noise-level readings. Built a RESTful backend using Node.js and Express.js with database integration for storing and retrieving noise data. Implemented user authentication and authorization using JWT, password security using bcrypt, API rate limiting, and data export functionality. The system provides APIs for managing noise readings and supports efficient monitoring of noise pollution data.

CyberGPT – Secure AI ChatBot | [Github](#)

Personal Project · Next.js, React, TypeScript, Tailwind CSS, Prisma, PostgreSQL, OpenAI API, NextAuth, Zustand, Vercel

Feb 2026 - Apr 2026

Artificial Intelligence

Developed a full-stack AI chatbot inspired by ChatGPT using Next.js, TypeScript, and OpenAI API. Implemented AI-powered conversations, user authentication, persistent chat history, responsive UI, and support for multiple AI models. Integrated PostgreSQL with Prisma for database management and implemented features such as chat management, token usage tracking, Markdown rendering, rate limiting, and dark mode. Built the project as a personal initiative to explore AI application development and secure, scalable web technologies.

Estatia – Premium Real Estate Portal | [Weblink](#)

Jun 2026 – Aug 2026

Internship Project · HTML5, CSS3, JavaScript (ES6), LocalStorage

Web Development

Developed a premium real estate portal that allows users to browse, search, filter, and explore property listings through a modern and responsive interface. Implemented user registration and login, property details, favourites, recently viewed properties, contact owner functionality, and dark/light mode. Also developed an admin dashboard for managing properties, users, contact messages, and property images. Used JavaScript and LocalStorage for application logic and client-side data management, with a focus on responsive design, smooth animations, and an elegant user experience

Volunteering

Santhan High School

Jun 2026 – Jul 2026

Technology Awareness Volunteer · Education & Technology Awareness

Skills

Framework: CSS, Flask, Streamlit

Database: My Sql

Programming Language: C, Python, Java

Web Development: JavaScript

Tool: Git, Vs Code

Domain: NLP, Machine Learning

Design and Simulation Tools: HTML

Languages

English [Fluent], Telugu [Professional], Hindi [Conversational]
